Alignment System**AMENDMENT UNDER RULE 111**Assistant Commission for Patents
Washington, D.C. 20231

Sir:

In response to the pending Office Action, mailed August 29, 2002 (Paper No. 7), Applicants hereby amend the above-captioned application and request reconsideration in view of the following remarks.

In the Claims:*Please amend claims 5, 16, and 26, as follows:*

a1
5. (amended) An optical component manipulation system as claimed in claim 4, wherein each of the stages rides on a system frame on respective first and second air bearings.

a2
16. (amended) An optical component manipulation system, comprising:
first and second opposed jaws for manipulating an optical component;
a first position detection system for detecting a position of the first jaw in two dimensions;
a second position detection system for detecting a position of the second jaw in the two dimensions;
a first actuator for positioning the first jaw in the two dimension;
a second actuator for positioning the second jaw in the two dimensions.
